

# The Creative Wedding Organizer and Planner

A wedding is a magical event and one of the biggest days of anyone's life. In the past, parents paid and planned the wedding according to family, cultural and religious traditions. Today, modern couples often foot the bill and many of them are moving away from tradition. The trend of personalized weddings is on the rise, made even more popular with the increase in interracial and interfaith marriages. Planning a personalized wedding adds a new twist, as couples are being more creative and incorporating their own individual personalities into their dream wedding day. The Creative Wedding Organizer and Planner has no rules or traditions to follow. Instead, it is filled with every tool imaginable to assist the couple in planning their big day, their way. Best of all, it is a binder, so it can be customized to suit their needs. An invaluable resource book, this planner contains three books in one: First, an organizer for all creative thoughts and ideas. There are spaces for making sketches, as well as protective sheets for storing magazine clippings, photographs and swatches. Second, a resource book with business card holders and over 100 detailed worksheets, indexed into eight chapters, which make finding important information a snap. And finally, a beautiful laminated keepsake book; it holds all the details of making the dream wedding day come true, including photographs from the wedding and honeymoon. Couples will enjoy opening it from time to time, reminiscing how their lives came together. Starting with A Story About How We Met and ending with Recollections About Our Honeymoon, this wedding planner will inspire a couple to magically create their dream wedding -- one that is as unique and individual as they are.
