

Adyar Gopal World: A Fact Finding Mission

This book is a compilation of the names of the ancestors and descendants of only these two protagonists viz. Gopalakrishna and his wife Radha Bai, and not every other family belonging to the Gowda Saaraswath Braahman (GSB) community. There are over seven hundred thousand GSB families living in the world (requires authentication). The descendants identified by the preliminary survey conducted by the author number about 2,500 as on October 15, 2012. However, the author does not vouch to the completeness of the register of this extended family of Gopalakrishna and Radha Bai. I hope to expand this to include more details such as the dates of births and deaths of the members, etc., for which I invite information from those who have such records.
