

Big Apple Takedown (WWE)

December 2001: Vince McMahon steps out of a snowy night into a diner in upstate New York for a meeting with old friend Phil Thomson, now a highly placed government official. Thomson has a strange proposition: creating a new covert black-ops group using the Superstars of World Wrestling Entertainment. The WWE's talented men and women are perfect. Highly skilled athletes with the ideal cover, they travel all across the country and the globe; no one would find it unusual to find them in a town one day and gone the next. The government would train and support the wrestlers in every way possible except one: no one must know the truth. March 2006: The Superstars have been handed their latest assignment -- take down a commercial-grade methyl-amphetamine plant that is bankrolling terrorist activities in Europe. Their mission seems simple and straightforward, until a member of their team is taken prisoner. Now all that they've worked so hard for is in jeopardy, and one of their own might be killed...
