

## My Classroom Family

How important is your family to your child? Who does he or she turn to when there is trouble or when there are reasons for celebration? Children spend the majority of their weekdays inside school. The relationships they make there can have a significant affect on their personality and well-being. Because of the importance of the classroom relationships, teachers and students should think of this group as an extension of their families. By treating each other as if they were related, a strong bond will form; this bond will help them feel secure and happy. My Classroom Family tells the story of a little boy who discovers just how important being part of a classroom family can be.
