

Urban Vodou: Politics and Popular Street Art in Haiti

The world's media has chronicled Haiti's long history of political instability and social unrest. But perhaps more importantly, Haitians themselves reacted to the cycle of hope and despair in the form of hundreds of spontaneous street murals. Mostly in the capital, Port-au-Prince, these colorful and expressive paintings both recorded key events and articulated the hopes and fears of their creators. Tragically, many of these paintings were among the casualties of the earthquake that struck the island in early 2010.
