

VINTAGE AUTOMOBILE POSTERS 2:: 1883-1939 VOLUME 2

VINTAGE AUTOMOBILE POSTERS 2:
LARGE FORMAT: ONE POSTER PER
PAGE The automotive industry began in
the 1880s and by the mid-1890s hundreds
of manufacturers were providing the world
with the horseless carriage. Michigan in
the mid to late 1800s was the leading
wagon, coach and buggy producer in the
world due to the types of trees that grew
abundantly in the mid-northern section of
the state, which produced wood and lumber
that was ideal for carriage manufacture due
to its flexible/bendable properties required
in making ever fancier carriages for the
up-and-coming middle class society. With
technology producing smaller, lighter and
more efficient motors, it wasn't long before
these enterprising carriage makers were
experimenting with engines that would
propel their carriages, thus eliminating the
need for horses. By 1939 the U.S. was
producing 90% of the world's automobiles.
Although Michigan was the nation's largest
automobile producer, over 2,500 different
automobile manufacturers had come and
gone by 1930 (Ohio alone had seen nearly
240 of these ventures); nearly every state of
the union, and most every mid-to-large city
could boast of locally produced
automobiles. This book contains an
international assortment of posters and
advertising from only some of the many
automobile manufacturers, sellers,
suppliers, clubs and racing organizations of
the late 1800s through the late 1930s, some
familiar, some forgotten, some still with us
today. ENJOY
