

Ghostwalk

In 2002, a Cambridge historian is found dead, floating down the river Cam, a glass prism in her hand, after researching a book about a series of suspicious circumstances surrounding Newtons appointment as a Fellow of Trinity College, Cambridge, in 1667. That year, two Fellows died by falling down staircases, apparently drunk; another died in a field, apparently drunk; and a fourth was expelled, having gone mad leaving vacancies for new appointments and paving the way for Newtons extraordinary scientific discoveries. When Lydia Brooke, at the request of her ex-lover, the historians son, steps in to finish the book, strange shows of light begin to play on the walls, and papers disappear only to reappear elsewhere. And when events escalate to murder, and Lydias rekindled romance appears increasingly implicated in the danger, the present becomes entangled with the seventeenth century, with Isaac Newton at the center of the mystery. Filled with evocative descriptions of Cambridge, past and present, of seventeenth-century glassmaking, alchemy, the Great Plague, and Newtons scientific innovations, Ghostwalk centers on a real historical mystery that Rebecca Stott has uncovered, involving Newtons alchemy. A riveting literary thriller, Ghostwalk is a rare debut that will change the way most of us think about scientific innovation, our perception of time, and the force of history.
