

# Levitation: Physics And Psychology In The Service Of Deception

Levitation tells the story of the most dazzling gravity-defying illusion ever performed on stage, and features a cast of characters that seems almost too good to be true: John Neville Maskelyne, the very proper scientist-magician and the tricks inventor; Harry Kellar, the brash American who fails to buy the illusion, so steals it instead; Howard Thurston, the handsome and charismatic performer who inherits the act from Kellar; and Guy Jarrett, the rough-and-tumble engineer who perfects the levitation and guides us through the unfolding drama. But true it is you'll never look at magic, or the mysteries of science the same way again.
