

Long Voyage Back

When the bombs came, only the lucky escaped. In the horror that followed, only the strong would survive. The voyage of the trimaran Vagabond began as a pleasure cruise on the Chesapeake Bay. Then came the War Alert...the unholy glow on the horizon...the terrifying reports of nuclear destruction. In the days that followed, it became clear just how much chaos was still to come. For Captain Neil Loken and his passengers, their shipmates were now the only family they had, the open seas their only sanctuary, their skill and courage all that might get them out alive.
