

Family (Notes) ... (a Funky Design)

(NOTE: This is an empty searchable notebook (with slots) for storing text only notes ... Its a minimalist diary/tracker of sorts which is designed to take almost no space.) Do you like to keep notes on things pertaining to your family (including close friends) or things that might be beneficial to them in the future? Do you ever think it might be nice to just jot down the last time your child or grandchild stopped in and what they told you about whats going on in their life? Do you think it would be fun to keep a diary about family activities but dont want to hassle with keeping track of paper (or whether you have good handwriting)? This document was designed for you because you can design your document. The categories are Family parking lots: to dos, kids, parents, kin and friends (with spots A to Z). The advantage of having a published document where you can park notes is that its easy to find and the information is stored in your {My Clippings} file - a text file which can be backed up regularly (recommended w/ something like MyClippings_date(txt)) on your computer or simply synced with the document if its on your computer. Beware: when you insert notes, you **MUST** make sure you save them and they are easy to delete and easy to overwrite (but great to have!). When you enter them, remember that the note number will most often show up **AFTER** the word (dont add notes at the **END** of the line). **YOU** want to put your cursor **BEFORE** the word/symbol and **MAKE SURE** that no other note is **BEHIND** the word/symbol (or highlighted word). Its possible to overwrite a note you dont see on the bottom or side of the screen if you dont pay attention to how they get stored. Just pay attention.
