

Generation A: A Novel

Generation A is set in the near future in a world where bees are extinct, until five unconnected people all around the world in the United States, Canada, France, New Zealand, and Sri Lanka are all stung. Their shared experience unites them in ways they never could have imagined. Generation A mirrors Coupland's debut novel, 1991's Generation X. It explores new ways of storytelling in a digital world. Like much of Coupland's writing, it occupies the perplexing hinterland between optimism about the future and everyday apocalyptic paranoia. Imaginative, inventive, and fantastically entertaining, Generation A is his most ambitious work to date.
